Here is, what the important gineers. Here is, what the important points you will want to take up as you plan for future workless washdays.

Architectural style of your house, room size, and plumbing have an important bearing on location, of course, and in many small one and two story homes, the basement continues to be the only space available for the laundry. First floor laundries, however, have been voted for by 70 per cent of women planning changes, according to recent Hotpoint surveys, and they believe this location will eventually supercede the basement entirely. The post-ware emphasis on the basementless "ranch" house has a direct bearing on this view.

The elimination of stair climbing has been a strong factor in influencing women in favor of the first floor, particularly those with large families who must do laundry and household account files, or the standard home laundry equipment was the standard home laundry equipment was the standard home laundry equipment in two storys homes and the future in two storys homes and not require bolting to the floor a fluid five mechanism on one new washer, for examples in the floor laundry usually is near the bathroom so that both rooms can be served by one set of plaumbing connections.
